

Wall fountain with a sculpted rosette crafted in weathered stone

This 1.5-meter-long wall fountain is a unique water feature hand-crafted in Provence with reclaimed stone. The rectangular basin features thick and flat coping stones. The stonework pediment is adorned with a nicely hand-sculpted stone rosette in relief. It is further enhanced by a charming cornice with a sculpted dripstone and moldings. This fountain in patinated stone is sold with an antique wrought-iron water spout and a pair of metallic bucket rest bars.
